OUR STORY

We at Styroplast are proud to be a flourishing family business in the heart of Nairobi's Industrial Area located at Gate 2, Migwani Road, Next to Tetra Pak, Off Enterprise Road.

The beginnings of this enterprise are from when one person migrated from India to Kenya over 40 years ago, in 1978, looking to start a new life in a new continent. Mr. Manish Shah at the age of 19 moved to Kenya and worked in the textile's factories at that time.

These were one of the prominent businesses within the community during those years. Within a few years Mr. Manish also invited his father Mr. Govindji Shah and his younger brother Mr. Shailesh Shah to join him in Kenya.

Together within few years they ventured out and took the bold step of starting a garments retail shop in 1986 within the heart of the Nairobi CBD on Tom Mboya Street. This was their first family business venture in Kenya. Business flourished, and during the next 10 years they expanded into holding significant interests in five shops within the same area.

The next step was to expand into wholesaling of garments and move away from retail business.

As a means of diversifying into various other businesses, in 1996 they took the first step into manufacturing. Acquiring a plastics business by the name of Styroplast Ltd, established in 1987. These were the first steps into the plastic industry for the trio. With little knowledge of plastics and a very go for attitude, they have run the business now for over 25 years.

Their knowledge and experience within the plastics industry has grown tremendously. During this period Mr. Govindji passed away and left the two brothers to run the business.

With this background and experience, when the opportunity struck again in 2016, they grabbed it, acquiring a plastic water tank manufacturing plant within the Athi River Area.

By this time, the 3rd generation, Mr. Manish's Son had joined the family business as well. The group currently are focusing their attention within two key markets: Hardware and Packaging Materials. New ventures include hardware metals products and packaging woven sacks.

Our Mission

Our mission is to provide quality products through quality manufacturing and extensive range of products and build great customer and supplier relationships.

Our Vision

To be a leading brand and provide quality hardware and packaging products, coupled with great service that enables us to build long term relationships with our customers, suppliers and other stakeholders.
